

one of ETC'S FULL LINE OF
HIGH SPEED, ULTRA HIGH SPEED & BURNISHING PADS

GORILLA® Minimal Burnishing-
Harder Finishes

The Original Blended Natural Fiber Pad that gives a "wet-look" shine. Gorilla® is made with a blend of natural fiber and polyester. This blend uses properties of both fibers to create the most unique and respected floor pad in the world. To clean it, just brush away dried wax with its die cut center. It will not glaze over.

JAGUAR® Multiple Burnishing-
Medium Finishes

A lighter blend of natural and synthetic fiber than Gorilla®. Designed for more frequent use than Gorilla®, with highly responsive finishes.

AQUA Plus® Multiple Burnishing-
Softer to Medium Finishes

This pad is designed for a burnishing schedule that calls for use 3-4 nights per week. It produces a very bright "wet-look" shine with soft to medium finishes. Use Aqua Plus® under Electric, Battery or Propane machines with ultra high speeds of 1500 to 3000rpm. Aqua Plus® is made from durable high-tech resins & fibers, plus a light sprinkle of natural fiber.

Blue Jay™ Maximum Burnishing-
Medium Finishes

A special blend of synthetic and natural fibers in a pad designed for nightly burnishing. This pad will give you an exceptional gloss.

**GORILLA
Lite®** Maximum Burnishing-
Soft Finishes

The lightest blend of natural fibers in a synthetic fiber pad for those who use a soft finish that requires nightly burnishing. This pad is designed to give you the same high gloss "wet-look" shine that big brother Gorilla® is known for.

BlueACE® Frequent Burnishing-
Soft Finishes

With this pad, we created a very soft, dense burnishing pad of fine synthetic fibers to deal with some of the newest finishes on the market. Blue ACE™ is designed for frequent burnishing with battery, electric or propane machines 1000rpm and above.

**Superspeed
Rubberized®** Maximum Burnishing-
Soft Finishes

A totally synthetic, non-aggressive pad designed for burnishing and polishing with a high speed or ultra high speed floor machine. The rubberized coating creates friction needed to repair softer finishes while removing black marks. The Superspeed Rubberized® floor pad will create a high gloss shine.

Based on your traffic, finish used, burnishing frequency and machine used to maintain your floors, your ETC Floor Care Expert can make recommendations to improve your floor care and save you money!

SAVE TIME! - SAVE LABOR! - SAVE MONEY!

BY REDUCING THE NEED FOR STRIPPING COSTS

FIRST

Monster[®]

1. With the Monster[®] pad and your favorite general purpose or neutral cleaner, light scrub, top scrub or deep scrub your floor to remove the level of dirt and damaged finish needed to apply a new layer of finish.

MONSTER

SECOND

2. Pick up the dirty slurry and rinse the floor to pick up all of the dirt and loosened finish. You don't want to apply finish over dirt.

THIRD

The Cure[®]

3. If you want the deepest shine, burnish with The Cure[®] to prepare the floor for finish. This will level and polish the remaining finish.

FOURTH

Great White[®]

4. Lay 1-2 coats of finish with "the original lint-free finish mop" Great White[®]. This unique mop will not lint and will glide across the floor with ease while applying a smooth layer of finish.

FIFTH

The Cure[®]

5. As soon as the finish can be walked on you should burnish with The Cure[®] to aid in the curing process. This will improve hardness, durability and reduce scuffing, scratching and black marks. Use only twice before switching to...(back page)
